 - Because of difficulties with a psychology certification, he decided to go back to school for accounting. He currently works as a third-party administrator for a 401K company.
- 5.) What are your hobbies?
 - Woodworking
 - Making Cosplay
 - Video Games

- 6.) Where did this love of woodworking come from? My dad always built things when I was younger. I was always intrigued by the process and wanted to help in any way I could.
- 7.) What was your earliest memory that you can recall? I remember being around 3 years old, my grandmother who was suffering from Parkinson's disease passed away in my bed. She was 64 years old.
- 8.) What is your favorite video game of all time? Final Fantasy 7. First foray into role playing games, a genre I love to play. The story was fantastic and really draws you in.
- 9.) First Cosplay? A mixture of Spiderman and Captain America. Spiderman Suit with Captain America's color scheme and Captain America's shield.
- 10.) What drew you to cosplay? After attending a Dragoncon convention in Atlanta, Georgia and seeing all the awesome costumes people created.

Inspirational Document

Over 2,000 thousand years ago, **woodworking** was a vital part of society for people across the globe at that time. Today it is one of the most popular hobbies for those searching for a creative outlet. Creative hobbies come with all sorts of benefits. They can greatly increase your self-esteem and confidence. They are a great way of relieving stress. They provide excellent ways to meet new people. Most people find hobbies of a creative nature incredibly fascinating to talk about.

Woodworking specifically has its own set of benefits. It is a great way to express yourself whether you're building furniture, upgrading spaces in your home, or creating things for purely artistic purposes. Working with wood can help save you money. Additionally, it can be a great source of income.

Cosplay is a term that stands for Costume Play. It is a performance art in which the participants dress in costumes and make-up, representing characters from anime, video games, television and film. In addition to creating authentic costumes, the cosplayers also act as the characters they are dressed in. They usually have a passion for the subject matter of the characters for which they are replicating.

Cosplay is also another great way to express yourself. It also allows one to show a great amount of creativity. Especially when cosplayers mesh two or more elements from different pieces of entertainment into one costume. Because cosplayers often love to share their creations it is a great way to meet people who have similar interests.

Since the 1980s, **video gaming** has become a popular way to pass the time for a lot of people. They can provide some benefits as well. They can increase mind/hand reaction times. They encourage teamwork. Playing **video games** can stimulate creativity, focus and visual memory. They also can help players learn critical thinking skills.

Stephen Switzer Bio:

In 1984, a few weeks before the revolutionary Macintosh personal computer was released by Apple Computer Inc, another revolutionary event took place. On January 12 of that year, a baby boy was born by the name of Stephen Switzer. Born in a quaint hospital in the small town of Pascagoula, Mississippi, his parents would bring the young Stephen home to Grand Bay, Alabama roughly a month later. The town of Grand Bay sits between the Mississippi state line and the much bigger city of Mobile.

Stephen's earliest memory was not a happy one. At 3 years old, his dad's mom suffering from Parkinson's disease passed away in little Stephen's bed. The details he recalls of the ordeal are few, but he does remember how different everyone acted after her death.

Stephen's hobbies he partakes in as an adult has roots to his childhood. His dad loved to use his woodworking skills to build things. Stephen was so enamored with the process and always wanted to help in any way he could. As an adult Stephen built himself an entertainment center, a coffee table, and added a deck to his house just to name a few. "If I look at something and think I would like to have that or make that... I see how I can make it happen." he states.

His creativity goes beyond just woodworking though. Halloween was always one of his favorite holidays as a kid. He loved the idea of dressing up and being someone completely different. After attending a ComiCon-like event in Atlanta Georgia, called DragonCon, his love of cosplay exploded. Since then, he has made several cosplay outfits from scratch. The most notable being a Spiderman/Captain America hybrid. It consisted of a Spiderman suit in Captain America's color scheme (red, white, and blue). It also came with Captain America's shield that displayed a spider at the center of it. When asked why he makes all his cosplay costumes instead of purchasing them outright he states "My wants and desires exceed the boundaries of my checking account. "

One last hobby of Stephen's that arose from childhood was his love of video games. One of his favorite games was called Final Fantasy 7, an epic story-driven role-playing game. The game was released in 1997 and won numerous awards that year. The game has been selected as the top game of all time by many gaming publications.

Stephen graduated college from the University of South Alabama with a Psychology degree in 2009 and an accounting degree in 2013. He currently resides in Daphne, AL where he works remotely as a third-party administrator for a 401K company.
